

Co-Formula Silane Coupling Agent

Item Code: CFS-579

Chemical Name: Chloromethyldimethylchlorosilane

Typical Properties

CAS No.: 1719-57-9

Formula: C₃H₈Cl₂Si

Density: ~1.0865

Refractive Index: ~1.4360

Appearance: Colorless or yellowish clear liquid

Purity: min 98%

Applications

Used for the synthesis of organic silicone intermediates.

Used as an important additive for pesticide preparation.

Used as a surface modifier for the treatment of inorganic fillers and substrates.

Packaging

CFS-579 is available in 200L drums.

Custom packaging possibilities are also available.

Transportation

UN2985 3(8)/PG II

More detailed and comprehensive information can be found in the corresponding Safety Data Sheet.

Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

Should be stored in its original containers and used up asap after opening.

The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
