

Co-Formula Silane Coupling Agent

Item Code: CFS-840

Chemical Name: Octyldimethylchlorosilane

Typical Properties

CAS No.: 18162-84-0

Formula: C₁₀H₂₃ClSi

Density: ~0.873

Refractive Index: ~1.4328

Appearance: Colorless clear liquid or white solid

Purity: min 96%

Applications

Used for the preparation of reversed-phase C12 chromatographic columns.

Used for pigment dispersion. Inorganic pigments treated with CFS-840 have superior dispersibility and hydrophobicity.

Used as a surface treating agent for inorganic filler. It can significantly improve the dispersibility and compatibility of inorganic fillers in the plastic, rubber and resin.

Packaging

CFS-840 is available in 25L PE pails, 200L steel drums or 1000L IBC totes.

Custom packaging possibilities are also available.

Transportation

UN2987 8/PG II

More detailed and comprehensive information can be found in the corresponding Safety Data Sheet.

Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

Should be stored in its original containers and used up asap after opening.

The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
