Item Code: CFS-887 Chemical Name: Bis(trimethylsiloxy)methylsilane

Typical Properties

CAS No.: 1873-88-7 Formula: C7H22O2Si3 Density: ~0.8136 Refractive Index: ~1.3815 Appearance: Colorless clear liquid Purity: min 99%

Applications

Used as an intermediate for hydrosilylation of organic compounds containing olefins. Used as a basic raw material for synthesis of polyether modified trisiloxane surfactant. The special surfactant with good hydrolysis stability, superior dispersibility and wettability, is suitable for water-borne paints and adhesives.

Used as an important additive in a wide variety of fields including cosmetics, paints and coating, Polyurethane sponge, and pesticide used in agriculture.

Packaging

CFS-887 is available in 25L PE pails, 200L steel drums or 1000L IBC totes. Custom packaging possibilities are also available.

Transportation

UN 1993 3/PG II More detailed and comprehensive information can be found in the corresponding SDS.

Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity. Should be stored in its original containers and used up asap after opening. The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
