

Co-Formula Silane Coupling Agent

Item Code: CFS-029

Chemical Name: Propyltriethoxysilane

Typical Properties

CAS No.: 2550-02-9

Formula: C₉H₂₂O₃Si

Density: ~0.8916

Refractive Index: 1.3956

Appearance: Colorless clear liquid

Purity: min 98%

Applications

Used as an important material of sol-gel systems.

Used in hydrophobic surface treatment of inorganic powder or filler.

Used as a component of polyolefin Ziegler catalyst.

Packaging

CFS-029 is available in 25L PE pails, 200L steel drums or 1000L IBC totes.

Custom packaging possibilities are also available.

Transportation

UN1993 3/PG III

More detailed and comprehensive information can be found in the corresponding Safety Data Sheet.

Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

Should be stored in its original containers and used up asap after opening.

The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
