Item Code: CFS-839 Chemical Name: Allytrimethoxysilane

Typical Properties

CAS No.: 2551-83-9 Formula: C6H14O3Si Density: ~0.963 Refractive Index: ~1.4036 Appearance: Colorless or light brown oily liquid Purity: min 96%

Applications

Used as a reagent for the synthesis of organic intermediates and compounds. Used to enhance the bonding performance of fluoro silicone rubbers and fluoro rubber with metal and other materials, with excellent bonding strength and stability. Used as an additive for unsaturated polyester and acrylic resin, glass fiber modifier, and crosslinking agent of high-density polyethylene. Used as a rubber agent for the modification of special rubber products.

Packaging

CFS-839 is available in 25L PE pails, 200L steel drums or 1000L IBC totes. Custom packaging possibilities are also available.

Transportation

UN1993 3/PG III More detailed and comprehensive information can be found in the corresponding SDS.

Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity. Should be stored in its original containers and used up asap after opening. The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
