

Co-Formula Silane Coupling Agent

Item Code: CFS-280

Chemical Name: 3-Isocyanatopropylmethyldiethoxysilane

Typical Properties

CAS No.: 33491-28-0

Formula: C₉H₁₉NO₃Si

Density: ~0.94

Appearance: Colorless transparent liquid

Purity: min 96%

Applications

Used as an adhesion promoter to enhance the adhesion performance between organic polymers and inorganic substrates.

Used for the surface treatment of metal, glass and other inorganic substrates.

Used for the synthesis of silane terminated polymers.

Packaging

CFS-280 is available in 25L PE pails, 200L steel drums or 1000L IBC totes.

Custom packaging possibilities are also available.

Transportation

UN1760 6.1(8)/PG III

More detailed and comprehensive information can be found in the corresponding Safety Data Sheet.

Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

Should be stored in its original containers and used up asap after opening.

The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
