Co-Formula Silane Coupling Agent

Item Code: CFS-343

Chemical Name: Methyltriacetoxysilane

Typical Properties

CAS No.: 4253-34-3 Formula: C7H12O6Si

Density: ~1.175

Refractive Index: ~1.4083

Appearance: Colorless clear liquid

Purity: min 90%

Applications

Used as an important crosslinker for RTV silicone rubbers. It can be used together with other acetoxysilane such as CFS-089, Vinyltriacethoxysilane.

Used in micro and nanoparticle surface modification for inorganic fillers.

Used as a coupling agent, an adhesion promoter in the synthesis of various organic silicone compounds.

Packaging

CFS-343 is available in 25L PE pails, 200L steel drums or 1000L IBC totes.

Custom packaging possibilities are also available.

Transportation

UN1759 8/PG III

More detailed and comprehensive information can be found in the corresponding Safety Data Sheet.

Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

Should be stored in its original containers and used up asap after opening.

The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
