

Technical Data Sheet

CFS-867, Triethylsilane

CFS-867, Triethylsilane is a trialkylsilicon hydride compound with a reactive Si-H bond. It mainly acts as an important intermediate for the synthesis of organosilicon compounds and silane coupling agents.

Typical Properties:

Chemical Name	Triethylsilane
Cas No	617-86-7
Formula	C ₆ H ₁₆ Si
Color	Colorless
Appearance	Clear liquid
Purity	min 99%

Applications:

CFS-867 can be used in organic synthesis. It is mainly used as an intermediate for the preparation of various silane coupling agents.

CFS-867 can also be used as a versatile reducing agent with its active hydride.

CFS-867 can be act as the catalyst or pharmaceutical intermediates in medicine industry.

Packaging:

CFS-867 is offered in 200L PVF steel drums.

Please contact Co-Formula team for any special packaging request.

Storage:

CFS-867 should be stored in a cool, well-ventilated place, and avoid exposure to humidity.

CFS-867 should be stored in its original containers and used up asap after opening.

When stored in a strictly sealed and unopened container, CFS-867 has a shelf life of 12months.
