

Co-Formula Silane Coupling Agent

Item Code: CFS-165

Chemical Name: 1H,1H,2H,2H-Perfluorooctyltrimethoxysilane

Typical Properties

CAS No.: 85857-16-5

Formula: C₈H₁₃F₁₃O₃Si

Density: ~1.44

Refractive Index: ~1.3322

Appearance: Colorless clear liquid

Purity: min 97%

Applications

Used for sol-gel system and the synthesis of fluoro resins and fluoro copolymers.

Used as a surface modifier and an adhesion promoter of inorganic materials such as pigments, glass and ceramics.

Used in wooden, fabrics and cosmetics with excellent surface performance.

Used for agricultural plastic films, acting as an important additive of dropping agents and fogging agent synthesis.

Packaging

CFS-165 is available in 25L PE pails, 200L steel drums or 1000L IBC totes.

Custom packaging possibilities are also available.

Transportation

Not hazardous goods.

More detailed and comprehensive information can be found in the corresponding SDS.

Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

Should be stored in its original containers and used up asap after opening.

The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
