

Item Code: CFS-A25

Chemical Name: Pigment Dispersing Agent (Solvent-based)

### Typical Properties

Appearance: Pale yellow or brown liquid

Active Ingredient:  $\geq 40\%$

Flash point: 47°C

Density: 1.000~1.100

### Applications

CFS-A25 can be widely used in automotive coatings, industrial coatings, gravure inks, inkjet inks, screen printing inks, architectural coatings, etc.

CFS-A25 can be used in solvent-based automotive coatings and industrial coatings with the following typical properties:

- Increase the pigment filling amount and improve the grinding efficiency
- Improve pigment coloring power and gloss
- Can reduce VOC in High solids coating system
- Improve Anti-flocculation and Anti-floating flower

### Packaging

CFS- A25 is available in 25L open-top cardboard drums.

Custom packaging possibilities are also available.

### Transportation

Non-hazardous for transportation.

More detailed and comprehensive information can be found in the corresponding SDS.

### Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

Should be stored in its original containers and used up asap after opening.

The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
