

Item Code: CFS-MS05

Chemical Name: Silane Terminated Polyether Polymer

### Typical Properties

Viscosity: 7000~9000 mPa·s

Modulus: High & Medium

Appearance: Colorless viscous liquid

VOC Content: <1%

### Applications

Used to produce construction and architecture sealants and coatings for various types of seals such as building roof, air-conditioning system, cracks repairing, doors and windows, kitchen, toilet and other facilities.

Used to produce STP sealants in automobile, high-speed rail and shipbuilding industries.

Used to produce STP adhesives and sealants assembling various products because of their non-bubble formation during curing process, which does not affect the mechanical properties of materials.

### Packaging

CFS- MS05 is available in 25L PE pails or 200L steel drums.

Custom packaging possibilities are also available.

### Transportation

Non-hazardous for transportation.

More detailed and comprehensive information can be found in the corresponding Safety Data Sheet.

### Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

Should be stored in its original containers and used up asap after opening.

The expected shelf life is 6months, when stored in a strictly sealed container and under proper conditions.
