

Item Code: CFS-O(A)

Chemical Name: Di-amino Silane Oligomer

Typical Properties

Appearance: Colorless or yellowish clear liquid

Applications

Used for the formulation of waterborne systems. It is mainly used as an important additive in waterborne coatings and primers, waterborne adhesives and sealants.

Used to reduce the viscosity of the system and improve easy-processing property.

Used for surface pretreatment and protection, especially suitable for wet surface treatment processing. It can also be used for surface treatment of metals.

Used as a surface modifier and a dispersing agent for various inorganic fillers.

Used to improve the dispersion of fillers and enhance adhesion and mechanical properties of the composites.

Packaging

CFS-O(A) is available in 25L PE pails, 200L steel drums or 1000L IBC totes.

Custom packaging possibilities are also available.

Transportation

Non-hazardous for transportation.

More detailed and comprehensive information can be found in the corresponding Safety Data Sheet.

Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

Should be stored in its original containers and used up asap after opening.

The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
