

Co-Formula Silane Coupling Agent

Item Code: CFS-766

Chemical Name: Isocyanatomethyltriethoxysilane

Typical Properties

CAS No.: 132112-76-6

Formula: $C_8H_{17}NO_4Si$

Density: 0.990~1.000

Refractive Index: 1.4190~1.4220

Appearance: Colorless transparent liquid

Purity: min 96%

Applications

Used as an adhesion promoter in paints and coatings, adhesives and sealants industries.

Used to improve mechanical and chemical properties of composites.

Used as a resin modifier in silane-terminated polymers (known as MS polymers) and silyl modified polyurethane polymers (SPUR polymers).

Used as a crosslinker and a tackifier of RTV and enhance the bonding between rubber and inorganic substrates.

Packaging

CFS-766 is available in 20L steel pails, 25L PE pails or 200L steel drums.

Custom packaging possibilities are also available.

Transportation

More detailed and comprehensive information can be found in the corresponding Safety Data Sheet.

Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

Should be stored in its original containers and used up asap after opening.

The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
