

## Co-Formula Silane Coupling Agent

Item Code: CFS-104

Chemical Name: Tetraethyl orthosilicate

### Typical Properties

CAS No.: 78-10-4

Formula: C<sub>8</sub>H<sub>20</sub>O<sub>4</sub>Si

Density: ~0.9335

Refractive Index: ~1.3818

Appearance: Colorless clear liquid

Purity: min 99%

### Applications

Used in metal surface as corrosion protection and water repellency.

Used to produce heat and chemical resistant coatings.

Used as a base material for anti-corrosion coatings (zinc- rich primers).

### Packaging

CFS-104 is available in 25L PE pails, 200L steel drums or 1000L IBC totes.

Custom packaging possibilities are also available.

### Transportation

UN1292 3/PG III

More detailed and comprehensive information can be found in the corresponding Safety Data Sheet.

### Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

Should be stored in its original containers and used up asap after opening.

The expected shelf life is 12months, when stored in a strictly sealed container and under proper conditions.
