

Item Code: CFS-A24

Chemical Name: Pigment Dispersing Agent

### Typical Properties

CAS No.: N/A

Formula: N/A

Density: 1.100~1.200

Melting Point: 45~50℃

Appearance: Light yellow solid

Active Ingredient Content: min 99%

### Applications

Used in industrial coatings (solvent-based), environmentally friendly packaging inks (alcohol, ester solvents), packaging inks (benzene, ester, ketone solvents), retort-resistant inks, UV inks and other systems.

Used in solvent-based automotive coatings.

Used in 3C digital product inks.

### Packaging

CFS-A24 is available in 25L open-top cardboard drum.

Custom packaging possibilities are also available.

### Transportation

Not dangerous goods.

More detailed and comprehensive information can be found in the corresponding Safety Data Sheet.

### Storage

Stored in a cool, well-ventilated place, and avoid exposure to humidity.

The expected shelf life is 24months, when stored in a strictly sealed container and under proper conditions.
